**NOTE**

**Sharjah has over 10,600 rooms**

\* available rooms will be reported based on the available rooms in hotels each day during the whole month, while inventory will be based on total rooms

## GLOSSARY

### ❖ ADR (Average Daily Rate)

A measure of the average rate paid for rooms sold, calculated by dividing room revenue by rooms sold.

$$ADR = \text{Room Revenue} / \text{Rooms Sold}$$

### ❖ Occupancy Rate

Occupancy is the percentage of available rooms that were sold during a specified period of time. Occupancy is calculated by dividing the number of rooms sold by rooms available.

$$\text{Occupancy} = (\text{Rooms Sold} / \text{Rooms Available}) \times 100$$

### ❖ RevPAR (Rev Per Available Room)

Revenue per Available Room (RevPAR) is the total guest room revenue divided by the total number of available rooms. RevPAR differs from average daily rate (ADR) because RevPAR is affected by the amount of unoccupied available rooms, while ADR shows only the average rate of rooms actually sold.

$$\text{RevPAR} = \text{Occupancy} \times \text{ADR}$$
